Typing Speed Test

10-Week Project Plan

Project Overview

Project Name: Typing Speed Test

Technology: Java (Swing GUI)

Duration: 10 weeks

Objective: The main objective is to measure a user's typing speed and accuracy within a limited time with detailed performance metrics and interactive feedback.

Project Diagram:

10-Week Plan Overview

Week	Phase	Description
01	Project setup & planning	Define scope, requirements, UI mockups, and tech stack.
02	Word & Sentence Database	Create word banks for Easy, Medium, Hard levels.
03	Core Typing Logic (CLI)	Implement typing timer, word matching, and accuracy logic.
04	Scoring & Level System	Add difficulty levels (1–4) and scoring rules.
05	Timer & Feedback System	Add countdown timer, live WPM, and accuracy display.
06	GUI Design (Swing)	Build main window, panels, buttons, and text areas.
07	Real-time Visual Feedback	Highlight correct/incorrect letters, progress bar.
08	Leaderboard & Save System	Save scores using file I/O or SQLite.
09	Testing & Bug Fixing	Unit testing, edge cases, and performance tuning.
10	Packaging & Launch	Build JAR, write user manual, and final presentation.

Week 1: Project setup & planning

Objectives

- Set up Java project structure
- Initialize Git repository with .gitignore
- Write Project Requirements Document
- Create UI wireframes

Task Breakdown

- Set up Java project structure and package organization.
- Initialize Git repository with .gitignore for Java/IDE files
- Write a Game Design Document (GDD) — rules, word categories, scoring, difficulty levels
- Create word lists for 4 difficulty levels (Easy: 3-5 chars, Medium: 6-8, Hard: 9-12, Expert: 13+)
- Install Swing environment and verify with a blank test window

Deliverables

- Software Requirements Specification document
- Game Design Document
- Project timeline
- Initialized project repository with folder structure

Tools & Resources

1. Java JDK 11+
2. IntelliJ IDEA / Eclipse
3. Java Swing Framework
4. Git & GitHub
5. Markdown Editor
6. Diagrams Software

UI wireframes:

1.Main Menu Screen:

2.Game Playing Screen:

3.Result Screen:
